

BLUEBERRY IRRIGATION

CHOOSE A CONSTANT AMID SEASONS OF CHANGE

We know that the booming blueberry industry is facing changing conditions and farmers must adjust to shifting blueberry economics. One constant remains – Netafim has **precision irrigation solutions** fit for your blueberry project. Solutions you can trust.

LET'S TALK ABOUT IRRIGATION

As the industry adapts and grows, it may be necessary to consider **irrigation equipment other than the traditional combination of solutions.**

Netafim SA is proud to support the industry with a wide range of precision irrigation solutions. This variety of solutions can be used in **different combinations** to ensure the **optimal cost-performance ratio.**

Take control of what you can. You can't control the weather, input costs and many other factors. Regain control by using inputs with extreme efficiency and ensuring that production is consistent and profitable. **Do this with precision irrigation.**

Precision irrigation will allow you to harvest a bigger and better yield to ensure profitability in context of expensive input costs, but **let's also be precise and efficient in our selection of precision irrigation equipment.**

SEE OVERLEAF FOR OUR COST-EFFECTIVE PRODUCT RANGE.

WHAT TO SELECT?

Many variables must be considered to select the right combination of equipment.

Climate	Soil type (physical and chemical attributes)	Soil preparation actions	Water quality and availability
Dosing unit - EC/pH control, nutrition management and scheduling demand	Soil or soilless approach	Orchard design and lay-out	Installation requirements
Availability of electricity	Typography	Management and maintenance ease	Farmer's knowledge of the system
	System reliability considering your circumstances.	Possibility of theft	

LET'S HAVE A LOOK AT THE OPTIONS AVAILABLE

BLUEBERRY IRRIGATION IN SOIL	
UniRam™ CNL	Pressure-compensating dripper for precise water delivery on any terrain. Anti-drain (CNL) mechanism allows very short irrigation pulses.
DripNet PC™	Pressure-compensating dripper for precise water delivery on any terrain. Suitable for longer pulses. Offers excellent cost-performance ratio.
DNL Valve (Dripper Non-Leakage)	Reduces emptying of submains and laterals between irrigation pulses. Reduces length of pulses.
BLUEBERRY IRRIGATION IN POTS	
NetBow™	Designed uniquely for pot irrigation. Uniform water delivery in every spot of the pot.
WPC CNL online dripper	Advanced pressure-compensating dripper with anti-drain mechanism to keep the submain/lateral full and allow shorter irrigation pulses.
WPCJ CNL online dripper	Pressure-compensating dripper with anti-drain mechanism.
Spider Assembly	Connects to microtube to deliver water directly into the soil for good water distribution.
DNL Valve	Reduces emptying of submains and laterals between irrigation pulses. Reduces length of pulses.
Microtube	Delivers water from the lateral driplines to the pot.
White blind pipe	Locally produced blind pipe for product flexibility. White colour increases solar reflection.
BLUEBERRY FERTIGATION – DOSING UNITS	
NetaJet 4G™	Precise nutrition management is crucial to successful blueberry production. A variety of fertigation solutions exist with ranging abilities and capacities. The perfect solution must be selected to ensure balance between investment and performance in this regard.
NutriDoser	
Fertikit™ 3G	
FILTRATION FOR BLUEBERRY IRRIGATION	
AlphaDisc™	Filter requirements vary depending on irrigation type, water quality and other factors. We offer a wide range of filters to ensure that your system is protected by the most suitable filter.
Spin-Klin™ Ruby	
Spin-Klin™ Apollo	

There is no perfect or one size fits all irrigation system. You must consider all of the advantages and disadvantages of a system and make a decision based on the circumstances of your farm, given all the variables. Be sure to rely on experts during the planning and preparation process. A properly designed and planned irrigation system that is managed correctly, will accommodate all the variables mentioned, and ensure total control of water and nutrition levels.

TAKE ON PRECISION BLUEBERRY IRRIGATION WITH THE RIGHT TEAM BY YOUR SIDE.
