

PRECISION IRRIGATION SOLUTIONS

2026

V1.5

Our purpose is to empower farmers to be more resilient and profitable, enabling them to grow the food we all depend on in sustainable ways that conserve our planet's resources and power a food-secure future. This purpose is brought to life by using **experience and expertise** to drive the adoption of precision irrigation. Netafim Southern & East Africa develops, deploys and supports precision irrigation solutions and practices to **help farmers grow more with less**.

Local manufacturing done within the guidelines of an integrated ISO management system – ISO 9001-2015, 45001-2018, and 14001-2004.

Expert Technical and Agronomic Field Team

Drip Irrigation Pioneer

The Cape Town factory, one of 19 global plants, extrudes driplines across 0.15 to 1.2 mm wall thicknesses.

Dripline manufacturing in SA since

1999

60+

Years of Innovation

Quality Precision Irrigation Solutions

110+ Countries

Loads of Knowledge Shared

Serving Southern Africa Since 1992

Integral Driplines

Pressure Compensating

UniRam™ RC and CNL

Flow rates: 0.7 / 1.0 / 1.6 / 2.3 & 3.5 ℓ/h

Wall thicknesses: 1.0 & 1.2 mm

Pipe diameters: 17 & 20 mm

DripNet PC™ and DripNet PC™AS

Flow rates: 0.6 / 1.0 / 1.6 / 2.0 / 3.0 & 3.8 ℓ/h

Wall thicknesses: 0.38 / 0.63 & 1.00 mm

Pipe diameters: 16 / 17 & 20 mm

UniTechline™ RC (Landscaping)

Flow rates: 1.6 & 2.3 ℓ/h

Wall thickness: 1.2 mm

Pipe diameters: 17 mm

TechNet™ (Landscaping)

Flow rates: 1.6 & 2.0 ℓ/h

Wall thickness: 1.0 mm

Pipe diameters: 16 mm

Dripline Products

Integral Driplines

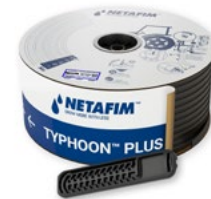

Non-Pressure Compensating

Aries™

Flow rates: 1.0 / 1.5 / 2.0 & 4.0 ℓ/h
Wall thicknesses: 0.63 / 0.70 / 0.80 & 1.00 mm
Pipe diameters: 12 / 16 & 20 mm

Typhoon™ Plus

Flow rates: 1.0 & 1.6 ℓ/h
Wall thicknesses: 0.31 & 0.38 mm
Pipe diameters: 16 mm

Streamline™ X

Flow rates: 1.05 / 1.10 / 1.60 & 2.20 ℓ/h
Wall thicknesses: 0.15 & 0.20 mm
Pipe diameters: 16 mm

Online Drippers & Accessories

WPC

Flow rates:
2.0 / 3.0 / 4.0 / 6.0 / 8.5 & 12 l/h
High and Low CNL

PC Junior

Flow rates:
0.5 / 1.2 / 2.0 / 4.0 & 8.0 l/h
Low CNL

Spider Assemblies

Pre-assembled irrigation
components for containers,
greenhouses, nurseries
and more

Blind Pipe – White

Pipe diameters: 16 & 20 mm
Manufactured in SA

Netbow™

12 cm with 4 outlets
25 cm with 8 outlets

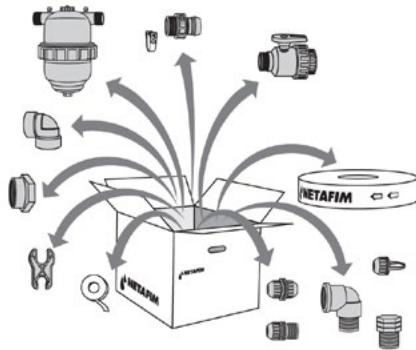

Online Drip Products

Drip Irrigation Kits

Drip Irrigation Kits

The FARMERS $\frac{1}{4}$ ha DRIP IRRIGATION KIT makes precision irrigation accessible to small-scale farmers. The kits include quality driplines and all the necessary complementary products for efficient drip irrigation. Drip irrigation puts the control in your hands by allowing you to control many of the manageable aspects that physically affect the growth of a plant.

This kit is designed to be expanded as your farm grows, uses durable Streamline™ X driplines and a quality ScreenGuard™ Mini, can operate at only 2 m pressure and requires no special tools for installation.

Sprinkler Products

Orchards and Vineyards

GyroSA

Flow rates: 15 - 120 ℓ/h
Irrigation

GyroNetTM

Flow rates: 27 - 300 ℓ/h
Irrigation, frost
mitigation and cooling

MegaNetTM

Flow rates: 200 - 750 ℓ/h
15 - 24 degrees
Full coverage,
under canopy irrigation
(Also used for open field)

VibroNetTM SD

Flow rates: 30 / 50 & 70 ℓ/h

SuperNetTM

Pressure compensating
Flow rates: 20 - 110 ℓ/h
Irrigation, frost mitigation and cooling

Sprinkler Products

Sprinkler Products

Sprinkler Products

Open Field

GyroNet™ Turbo

Flow rates: 200 - 300 ℓ/h
Full coverage irrigation

D-Net™ 8550

Flow rates: 510 - 1275 ℓ/h
Germination, full coverage & under canopy irrigation

SpinNet™

Flow rates: 50 - 200 ℓ/h
Full coverage & double row irrigation
Hardening off

VibroNet™

Flow rates: 40 ℓ/h
Full coverage germination

Protected Crops

Pulsar™ + StripNet™ X

Flow rate: 30 ℓ/h

Pulsar™ + GyroNet™

Flow rates: 8 - 30 ℓ/h

Frost mitigation & other crop management applications

CoolNet™ Pro

Flow rates: 5.5 - 7.5 ℓ/h per nozzle
Single/Tee/Cross
Cooling, rooting & humidification

NutriDoser V (3 Channel)

400 ℓ/h Flow rate range: 8 - 160 m^3/h

NutriDoser MAN

1 x Chemical 1000 ℓ/h channel
2 x Fertiliser 4000 ℓ/h channels
One channel active at a time

Let's Hear From Farmers

"The value of working with Netafim goes beyond their quality driplines. It has been a privilege to build a relationship with the team. They have played a pivotal role in our success with drip irrigation. There is further value in the fact that Netafim can supply quality irrigation equipment beyond driplines."

– Kallie Frey, Olive Production Manager,
De Rustica Olive Estate

"The biggest benefit of using Netafim products is the support in the field. There are many other products in the market that I have tried, but with none of those products did I ever receive this level of support after installation."

– John Fullard, Farm Acres 4

Netafim in the Field – Value Added Services

We sell our products through a dealer network and have a field team strategically placed across our active regions.

Agronomic support is a core component of our field activities. Our agronomy team provides Netafim end-users with expert technical guidance, practical knowledge transfer, and data-driven insights. This includes the execution of research trials, water distribution uniformity assessments, and detailed water quality analyses to inform crop production and irrigation decisions.

The team also conducts dripper performance evaluations to guide chemical maintenance strategies, profile pit assessments to support accurate irrigation scheduling, and advises on aligning irrigation system design with crop requirements, soil characteristics, and climatic conditions. Collectively, these services ensure that irrigation systems are managed optimally, delivering improved efficiency, sustainability, and return on investment for our clients.

The Netafim Southern & East Africa field team:

5 Agronomists
supported by more
than 150 agronomists
globally

13 Technical
Advisors supported
by more than 60
years of expertise
