

GYROSA SD 15 ℓ/h

ADAPTED LOW FLOW MICRO-SPRINKLER

It has been historically difficult until now to achieve flow rates lower than 20 ℓ/h in micro-sprinklers.

Netafim South Africa has now developed the 15 ℓ/h GyroSA adapted micro-sprinkler.

Targeted and uniform water delivery

Robust and cost-effective

Manufactured in South Africa

Specifications

- ✓ Purple colour for easy distinction from other colour-coded GyroSA parts
- ✓ Diameter of black nozzle 0.85 mm
- ✓ Diameter of SD 0.85 m
- ✓ To be used with barbed butterfly without bayonet
- ✓ Green swivel only - Wetted diameter = 1.8 m
- ✓ Recommended filtration: 130 micron

→ APPLICATIONS

With decreasing tree spacing, as is common now in many orchards, we need decreasing flow rates. In addition, we have seen run-off occurring in some soils with lower infiltration rates.

The 15 ℓ/h adapted micro-sprinkler has been able to overcome this in certain cases and allows GyroSA to be applied on a wider range of crops, areas, and circumstances. More farmers can now benefit from the many advantages GyroSA micro-sprinklers offer.

Technical Data

PURPLE SD ADAPTOR	
MODEL	015
DIAMETER (mm)	0.85
FLOW RATE (ℓ/h)	15.1
K	4.45
X	0.53
